TARIFF FORMAT SHEETS

- A. Sheet Numbering - Sheet numbers appear in the upper right corner of the page. Sheets are numbered sequentially. However, new sheets are occasionally added to the tariff. When a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between sheets 14 and 15 would be 14.1.
- B. Sheet Revision Numbers - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current sheet version on file with the South Carolina PSC. For example, the 4th revised Sheet 14 cancels the 3rd revised Sheet 14. Because of various suspension periods, deferrals, etc., the South Carolina PSC will follow in their tariff approval process, the most current sheet number on file with the Commission is not always the tariff page in effect. Consult the Check Sheet for the sheet currently in effect.
- C. Paragraph Numbering Sequence - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets - When a tariff filing is made with the South Carolina PSC, an updated check sheet accompanies the tariff filing. The check sheet lists the sheets contained in the tariff, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc. remains the same, just revised revision levels on some pages). The tariff user should refer to the latest check sheet to find out if a particular sheet is the most current on file with the South Carolina PSC.

- G. Without notice in the event of tampering with the equipment or services owned by the Company or its agents.
- H. Without notice in the event of unauthorized or fraudulent use of service. Whenever service is discontinued for fraudulent use of service, the Company may, before restoring service, require the Customer or Subscriber to make, at his or her own expense, all changes in facilities or equipment necessary to eliminate illegal use and to pay an amount reasonably estimated as the loss in revenues resulting from such fraudulent use.

An increase to the deposit may be required if the Customer later defaults in its payment obligations. The deposit will not exceed an amount equal to:
 - 1. Two months' rates and charges for a service or Company Facility which has a minimum payment period of one month; or

The charges that would apply for the minimum payment period for a service of Company Facility which has a minimum payment period of more than one month; except that the deposit may include an additional amount in the event that a termination charge is applicable but in no event shall any deposit exceed two and one-half twelfths (2.5/12) of the annual estimated rates and charges for the service pursuant to Georgia Regulations (515-12-1-.05(4)).
- B. The Company may, at its option, return the deposit to the Customer or credit the deposit to the Customer's account at any time. When a Company Facility or service is discontinued, the amount of any deposit that has not already been returned to the Customer will be applied to the Customer's account and any credit balance remaining will be refunded to the Customer.

SECTION 3 - DESCRIPTION OF SERVICE3.1 Timing of Calls3.1.1 When Billing Charges Begin and End For Phone Calls

The Customer's long distance usage charge is based on the actual usage of the Company's network. Usage begins when the called party picks up the receiver, (i.e. when 2 way communication, often referred to as "conversation time" is possible.). When the called party pick up is determined by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. A call is terminated when the calling or called party hangs up.

3.1.2 Billing Increments

Unless otherwise specified in the service descriptions, the minimum call duration for billing purposes is thirty (30) seconds for a connected call and calls beyond six (6) seconds are billed in six (6) second increments. Partial increments are rounded up to the next whole increment

3.1.3 Per Call Billing Charges

Billing will be rounded up to the nearest penny for each call.

3.1.4 Uncompleted Calls

There shall be no charges for uncompleted calls.

SECTION 3 - DESCRIPTION OF SERVICE (Cont.)3.2 Calculation of Distance

Usage charges for all mileage sensitive products are based on the airline distance between rate centers associated with the originating and terminating points of the call.

The Company uses the rate centers that are produced by Bell Communications Research in the NPA-NXX V & H Coordinates Tape and Bell's NECA Tariff No. 4.

Formula:

The square root of:
$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$
